Date: 25th Aug, 2025

TO WHOMSOEVER IT MAY CONCERN

This is to certify that the project work and report entitled during the Summer Internship on **“Develop your OWN Agentic AI Platform with Autonomous AI Agents for Intelligent Task Execution and Decision-Making.”** embodies the original work of **Mr. Aryan Singh** from **GLA University Mathura** at LinuxWorld Informatics Pvt Ltd.

The duration of the project undergone as mentioned above, under the mentorship of Mr. Vimal Daga, Technical Head was from 23rd May 2025 – 1st August 2025.

Project Description :

This project is a menu-driven system designed to integrate 51 different tasks spanning JavaScript frontend automation, Docker-based virtualization, Python automation, and machine learning experiments.

The aim is to consolidate diverse operations—from sending emails and WhatsApp messages to running ML models inside Docker— into a single interactive menu-based application.

Technologies Used

- Python 3.12+ (Backend, Automation, ML Workflows)
- JavaScript (Frontend Automation)
- Docker (Containerization)
- Streamlit (Menu-driven Interface)
- Paramiko (SSH Remote Execution)
- pandas, scikit-learn (Data Processing & ML)
- APIs: EmailJS, Twilio, Gmail API, Google Maps API, AWS SDK

Features :

The system integrates a wide range of tasks categorized into JavaScript + Docker, Python Automation, and Cloud/Machine Learning functionalities. Below is the complete list:

LinuxWorld Informatics Pvt. Ltd.

CIN: U72900RJ2012PTC039171

Future Scope :

- Integration of Deep Learning Models (CNNs, Transformers)
- Multi-cloud support (Azure, GCP)
- Mobile-friendly App version
- Role-based Access Control for Enterprises
- Real-time Dashboards for Cloud & Docker
- Expansion into CI/CD DevOps pipelines

Conclusion:

This project demonstrates the successful integration of 51 diverse tasks into a single unified menu-driven platform. It merges automation, containerization, cloud, and machine learning into a practical system that simplifies workflows for developers and learners. The modular architecture ensures scalability and acts as a strong foundation for both academic learning and professional automation solutions.

We wish him all the success for his future
Regards
